

Standard hydraulic power packs type SSH

vertical motor, submersed pump - reservoir capacity 10, 25 and 50 liters

SSH hydraulic power packs are compact design standard units made according to machinery directive 2006/42/CE with vertical motor pump unit.

Electric motors and pumps are available in different variants, modular subplates type BA-244/*, to realize customized hydraulic circuits with modular and directional valves (ISO 4401 size 06), can be assembled are mounted on the cover.

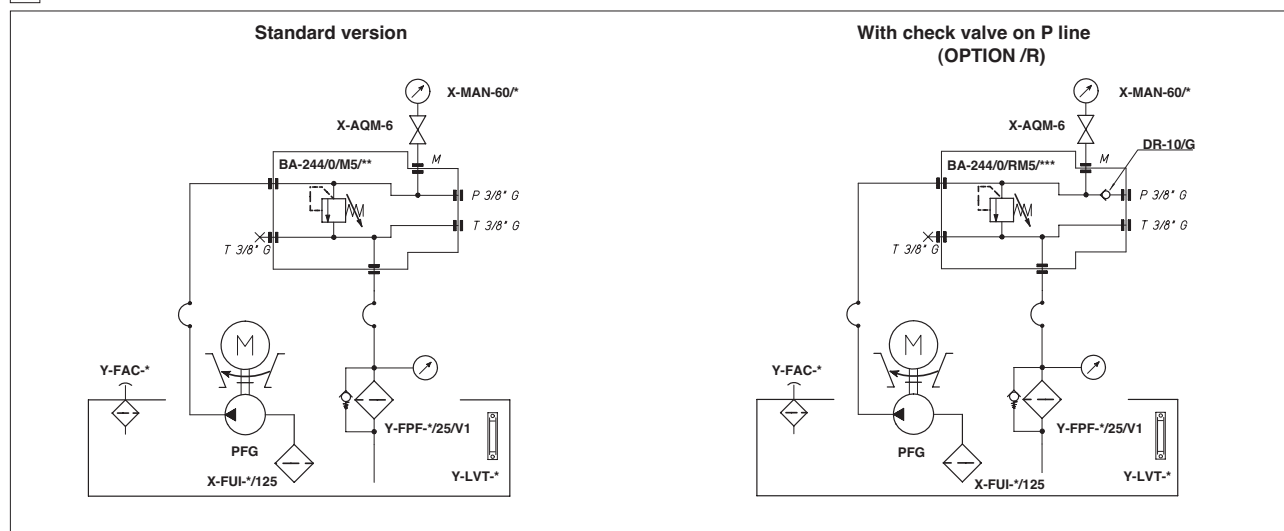

Basic version is composed by:

- ① electric motor coupled with hydraulic pump ②;
- ③ suction submersed filter;
- ④ return filter with visual clogging indicator;
- ⑤ pressure relief valve;
- ⑥ glycerine filled pressure gauge Ø 60 with shut-off valve ⑦;
- ⑧ reservoir with visual oil level ⑨, filling plug with air filter ⑩ and emptying ⑪.
