

Information

ACMOS® 100 - 2450 release spray

prevents the adherence of glues and adhesives

BASIS:

No substances regarded as toxic or carcinogenic according to the Regulations concerning Dangerous Substances are used in the production of **ACMOS 100-2450**.

PROPERTIES:

ACMOS 100-2450 does not contain silicones and CFC propellant. Prevents the adherence of glues and adhesives and acts against dextrin adhesives, dispersion adhesives, gluten glues, phenolic, melamine and similar resins.

APPLICATION:

Ideal application (spray) also in areas not easily accessible. Apply thinly on the areas to be protected. Particularly suitable for edge banding machines.

SUPPLY FORM:

Carton with 12 spray cans each containing 400 ml.
Storage time 18 months.
